(54) Title: METHOD OF PLACING AT LEAST ONE COMPONENT ON AT LEAST ONE SUBSTRATE AS WELL AS SUCH A SYSTEM

WO 2004/086840 A2

(57) Abstract: A method of placing at least one component (25) on at least one substrate (24), a component (25) being picked up by means of at least a placement machine (2) and placed on a desired position on the substrate (24). After the component (25) has been placed on the substrate (24), an image of the component (25) placed on the substrate (24) is made by a camera (5, 23), a difference between the real position of the component (25) on the substrate (24) and the desired position of the component (25) on the substrate (24) being established on account of the image. The positioning of a next component (25) to be placed is adapted on account of the difference found.
